

Millikin University
Report on Student Learning in IN 150 and 151
(Critical Writing, Reading and Research I and II)
Academic Year 2014-2015
Dr. Jeffrey S. J. Kirchoff, IN 150/151 Coordinator
June 12th, 2015

Executive Summary

Critical Writing, Reading, and Research (CWRR) I and II—also designated as IN 150 and 151 respectively—are part of the sequential requirements in the Millikin Program of Student Learning (MPSL). Housed in our University Studies' interdepartmental sequential curriculum required of all students—including traditional, enhanced, honors, and PACE—IN 150 and 151 are vital to Millikin's ongoing Writing-Across-the-Curriculum initiative (i.e. IN 250, 251, and 350), while also working to support university-wide learning goals. Specifically, our four learning goals—critical reading, writing, research, and reflection—mirrors Millikin University's ongoing goal of fostering student's ability to critically think and read in an effort to conduct ongoing inquiry.

To best assess how the CWRR program helps students meet the four learning goals outlined above, we use authentic artifact assessment of student-produced writing. Specifically, all CWRR students are required to submit three different pieces of writing for programmatic assessment: a reflection (collected in IN 150), a reading response (collected in IN 151), and a research essay (also collected in IN 151). Because we believe in instructor autonomy, we do not have a standardized assignment sheet for each artifact, but rather, we ask that instructors adhere to our learning goals and incorporate these goals into their classes and writing projects. An assessment team, put together by the IN 150/151 coordinator, goes through a rigorous norming session (lead by the IN 150/151 coordinator) and then, using a rubric designed specifically for each artifact, assesses a percentage of the artifacts submitted (usually 10% of submitted reflections, reading responses, and research essays respectively).

The 2014-2015 assessment of the CWRR program reveals that our students can use more help with all the artifacts. Assessment of the three student artifacts clearly indicates that students are performing at adequate levels, as all three artifacts were scored **Yellow**. There will be more on this in section three.

The following document contains the following sections:

1. An overview of the CWRR program and how the collected artifacts are used to assess our learning goals (page 2)
2. An overview of the 2014-2015 CWRR program, paying particular attention to staffing, class sizes, classrooms, and initiatives undertaken during the academic year (page 3)
3. Assessment data of the three artifacts collected and analysis of data (page 9)
4. Suggestions for 2015-2016 (page 12)
5. Appendices—Rubrics (page 16)

Section 1: Overview of CWRR

The learning outcome goals of the two-course sequence of IN 150 and 151 are as follows:

1. Read critically to comprehend, analyze and evaluate texts
2. Write polished, informed essays for personal, public and/or specialized audiences
3. Conduct research to participate in academic inquiry
4. Reflect on engagements with critical reading, writing and research to acquire, examine and present self-awareness about those engagements.

The following table describes how our learning goals are assessed through our data collection process (described above in the Executive Summary).

Table 1: Learning Goals/Artifacts

Data	Goal 1	Goal 2	Goal 3	Goal 4
Reading Response	X	X		
Research Essay	X	X	X	
Reflection		X		X

What is unique to Millikin University's first year writing sequence is that every student is required to take BOTH courses; there is no testing out of IN 150 or IN 151. In IN 150, students broadly explore academic inquiry through formal and informal essay writing. Naturally, there is an emphasis on the relationship between critical reading and writing, but how that relationship is taught varies widely from instructor to instructor. In IN 151, students continue their intellectual inquiry and growth by investigating and researching a topic of their choice. Both classes emphasize skills we deem to be imperative for academic and professional success: there is an emphasis on reading, writing, research, and reflection that we believe are applicable across disciplines.

Table 2: Curriculum Map

	Goal #1	Goal #2	Goal #3	Goal #4
CWRR I	X	X	X	X
CWRR II	X	X	X	X

The CWRR learning outcomes also help deliver the university-wide goals, articulated below:

1. Professional success
2. Democratic citizenship in a global environment
3. A personal life of meaning and value.

The program contributes primarily to *professional success preparation* and the *development of a personal life of meaning and value*. Specifically, CWRR's first, second, and third learning goals (see above) help prepare students for *professional success* by introducing students to:

- Academic inquiry (supplanted by information literacy instruction)
- The ability to identify with and write for a specialized, public audience
- The ability to carefully and thoughtfully read and analyze a variety of text types.

Asking students to reflect on the uses of reading and writing (the fourth goal) prepares students for a life of *personal meaning and value*. While there are opportunities for IN 150 and 151 to contribute to the development of democratic citizenship in a global environment, it is not a main focus of the program.

The four learning outcomes of the CWRR program also help deliver the following MPSL student learning outcome goals:

1. Learn to access, read deliberately, critically evaluate, reflect on, integrate, and use appropriate resources for research and practical application
2. Utilize qualitative inquiry as tools in decision making and creative problem solving
3. Demonstrate general technological literacy
4. Develop an understanding of themselves and the ability to reflect on and express their thoughts and feelings responsibly.

Additionally, the CWRR program works to introduce students to Millikin's adherence to the theory into practice model (oft referred to as "Performance Based Learning") by asking students to put the writing/reading theories discussed in class into practice (in the form of essay writing). Moreover, we are actively looking to offer students the opportunity to write for "real" audiences. For example, we're continually offering "Performance Based Learning" opportunities in the form of the Millikin Premier Writer contest and through the annual Celebrations of Scholarship.

Section 2: Overview of 2014-2015 CWRR

This "snapshot" aims to show the number of courses offered per semester, the types of courses offered per semester, an understanding of who is teaching our courses, class sizes, facilities used, partnerships external to the program, and initiatives undertaken by the program during 2014-2015.

Class Size

Table 3: Fall 2014 Overview

Type of Course	Number of Sections Offered	Average Class Size
PACE 150	1	4
Traditional 150	19	20.2
"Enhanced" 150	2	20
Honors 150	4	16.8
PACE 151	1	15
Traditional (Off-Semester) 151	2	19.5

Table 4—Spring 2015 Overview

Type of Course	Number of Sections Offered	Average Class Size
PACE 150	1	8
Traditional (Off-Semester) 150	2	17.5
PACE 151	1	11
Traditional 151	20	16.7
Honors 151	4	16

Table 5—Trends in Class Sizes

	2014-2015	2013-2014	2012-2013	2011-2012	2010-2011	2009-2010	2008-2009	2007-2008	2006-2007
Average Class Size	17.3	18.3	17.7	19.5	Data Missing	19	18.58	18.07	18.6

Class Size: Data Analysis

According to a special committee formed by the Conference on College Composition and Communication (4Cs)—a subsidiary of the National Council of Teachers of English and one of the major governing bodies for first year writing policies—traditional first year writing classes should not exceed 20 students. Basic, or remedial, writing courses, should not exceed 15 students. This position statement, entitled “Principles for the Postsecondary Teaching of Writing,” was originally crafted in 1989, but was actually revised at the 2015 Conference on College Composition and Communication (held in Tampa, FL). It is of note, perhaps, that the Association of English Departments (ADE) has adopted 4Cs guidelines and thus asserts that maintaining these class sizes should be part of a writing program’s mission. Given Millikin’s mandate to provide first-rate education for its students, it is imperative that the first year writing program—including both IN 150 and IN 151—closely follows the guidelines put forth by 4Cs and not have any writing courses exceed 20 students, and more specifically, not having our “Enhanced” or off-semester sections (akin to remedial writing courses) exceed 15 students.

The data collected on course sizes for 2014-2015 reveals that the writing program did an exemplary job of holding class sizes down in IN 151. In fact, table five reveals that the good work we did in holding class sizes down in IN 151 helped us produce our lowest class average for the academic year over the last seven data collection periods.

However, there was some difficulty maintaining a reasonable class size in IN 150. While class size was not an issue for the PACE and Honors sections of IN 150, this was an issue for the traditional, off-semester, and, most egregiously, “enhanced” sections of IN 150. Consider: “enhanced” sections of IN 150 in the Fall of 2014 had an average of 20 students. Not only is this five students above the recommendation put forth by 4Cs and ADE, but it is only 0.2 students *fewer* than our traditional IN 150 course offerings. Given the writing difficulties our “E” students have, it is absolutely essential for their success to keep a firm cap of 15 students. To

over enroll these sections by five students each is not fair to the students or to the instructors of these courses. Thankfully, we corrected this issue by the Spring of 2015, and our average (Traditional) IN 151 class size was a laudable 16.7 students per class.

Suggestions to Keep Class-Sizes Down for 2015-2016

- Following Orientation and Registration, the first-year writing coordinator will check class sizes on a weekly basis in an effort to keep a firm cap of 20 students for Traditional sections of 150 and 151, 18 students for Honors sections of 150 and 151, and 15 students for “Enhanced” and off-semester sections of 150.
- To that end, the first-year writing coordinator will stay in close contact with the English Department chair, the Dean overseeing University Studies, and the Registrar to ensure that course caps are enforced. The first-year writing coordinator will attempt to open new sections of IN 150 or IN 150 (E) if enrollment exceeds projections.
- Similarly, though, if enrollment falls short of projections, the first-year writing coordinator will work with the aforementioned parties to consolidate courses in an effort to not waste university resources, while still maintaining the mandated course caps.
- The first year writing coordinator will aim to increase the number of “E” sections offered. By only offering two sections of IN 150 “E,” two outcomes are possible. First, the sections could become over enrolled. Second, several students who would benefit from an “E” section—and would have been placed in an “E” section if not for the course cap—are placed in a traditional 150.
 - As such, the first year writing coordinator suggests identifying several “bubble” courses for “E” and “Honors.” These are sections that will be listed as “E” or “Honors” but should we not need those additional sections, be converted back to “Traditional.”

Faculty and Facilities

Table 6: Breakdown of Faculty and Facilities Fall 2014

Faculty and Facilities: Analysis

Millikin University commits to having its full-time faculty teach first year writing courses. This, however, is not to trivialize the significant contributions part-time instructors make to our first year writing program. However, past program reports have asserted that an ongoing goal is to ensure full time faculty teach first year writing; we have continued to do this in 2014-2015. It should be noted that the Spring of 2015 marked the return of a full time faculty who was on leave in Fall 2014. This is the reason for the additional part-time instructor in Fall 2014. Moving forward, it remains important to a) keep the support of full time faculty instructors for our first year writing program and b) respect and value the contributions made by part time instructors. To that end, it is imperative that we keep the first year writing course load manageable: no more than two FYC courses per semester for tenured/tenure track faculty and no more than three FYC courses per semester for non-tenured/tenure-track faculty. This will allow our faculty to invest the proper amount of time for meeting with students, assessing student work, and prepping lessons for the course itself.

It should be noted that there is current faculty development put in place by the first year writing coordinator, including:

- Observations. The first year writing coordinator observes all new faculty and provides feedback; upon request, the first year writing coordinator will also observe any returning faculty and provide feedback
- Mentorship. Though run through the English Department/English Department chair, each faculty member has a mentor/partner to share ideas with.
- Syllabi review. This is required of all new faculty, and will be expanded upon in 2015-2016 to be required of all faculty (new and returning)
- Regular meetings. Lead by the first-year writing coordinator, the meetings cover a range of topics. These will be more focused on pedagogy in 2015-2016.

In 2014-2015, CWRR courses were taught in the following locations: Shilling Hall, Staley Library, Kirkland Fine Arts Center, and ADM-Scovill Hall. Following the trend in past years, the majority of the sections were taught in Shilling Hall and ADM-Scovill. Most CWRR faculty request facilities equipped with educational technology stations, and many ask for a computer lab. We believe that teaching writing using technology is imperative to student success in the 21st century—a belief that mirrors many in first year writing. According to the Conference on College Composition and Communication (CCCC) “Position Statement on Teaching, Learning, and Assessing Writing in Digital Environments,” “[I]ncreasingly, classes and programs in writing require that students compose digitally.” The CWRR Program continues to move in the direction of these priorities and seeks an increasing number of facilities for teaching CWRR courses in electronic lab classrooms. To that end, we piloted a new kind of CWRR course this past year: the Electronic Learning Community. These courses, which require all students enrolled to bring a fully charged laptop to every class, reduces some of the strain on CWRR faculty requesting a limited number of computer labs for class. In the Spring of 2015, Dr. Cook and Dr. Kirchoff piloted an IN 151 ELC with great success, and the result is that six IN 150 course

offerings in the Fall of 2015 will be “Wireless Environment” courses (“WE” replacing “ELC” as the designation to avoid confusion with the “English Language Center”).

Suggestions for Faculty and Facilities 2015-2016

- Continue to ensure full-time faculty buy-in for the first year writing program
- Support all faculty teaching first year writing by increasing the number of *workshops* offered during the semester. These workshops will not mandate assignments or lesson plans, but will rather serve to offer ideas for new projects to all the faculty teaching first-year writing. Thus, the first-year writing coordinator may ask full-time and/or part-time faculty to lead or co-lead a workshop at some point during the Fall or Spring semesters.
- Moreover, the first-year writing coordinator will continue to encourage faculty to submit documents to the “repository” started on Moodle.
- The first-year writing coordinator commits to collecting syllabi from all first-year writing faculty to ensure learning goals are met.
- Continue to support “WE” sections to reduce the number of computer lab requests. Work with IT Committee to ensure students can secure laptops at an affordable price. Work with IT Committee to ensure Millikin has enough wireless access points.
 - Similarly, continue to try and secure computer labs for non-WE sections

Initiatives From 2014-2015

4Cs Certificate of Excellence for Writing Programs

- At the beginning of the Fall semester (2014), Dr. Kirchoff (first-year writing coordinator) proposed Millikin’s CWRR program consider pursuing one of the 4C’s certificate of excellence for writing programs. Though the idea was met with widespread enthusiasm, applying for the certificate is on hiatus for now, as we need to strengthen the program before considering application (see section five for more on this). Specifically, placement protocol needs to be more authentic and reliable, and learning goals need to be revisited to align with NCTE’s first-year writing learning goals.

“WE” sections

- As discussed earlier, Dr. Cook and Dr. Kirchoff piloted two sections of an “Electronic Learning Community” (since re-designated as “Wireless Environments”) in IN 151. These sections were labeled as laptops-required courses, and students were told up-front that they would be asked to bring laptops (fully charged) to each and every class. The students responded positively to the environment, and in the Fall of 2015, we will offer six “WE” sections. As we continue moving forward, “WE” sections seem like viable alternatives to computer labs. However, we must ensure that our students have access to affordable laptops should we wish to expand “WE” sections further. Moreover, we need to ensure that Millikin’s wireless internet is capable of so many people accessing the network at one time. Thus, the number (and strength) of access points should be revisited.

Assignment Repository

- In an effort to share resources and ideas—supporting the notion that all instructors are life-long learners—an assignment and lesson-plan repository has been established on Moodle. This repository is available to all first year writing faculty and contains successful lesson plans and assignment sheets used by others within the program. Efforts will be made to sustain this initiative in 2015-2016 and beyond.

Website Re-Design

- CWRR's web-presence prior to this academic year was a bit sparse and outdated; this is unfortunate because as many of us know, our web presence is a valuable recruiting tool. As such, the first-year writing coordinator worked to condense and update the material posted to better represent the work we do. While improved, it can continue to be tinkered with in an effort to best show the fine work being done in CWRR. You can see the revised website at <https://www.millikin.edu/academics/cas/cwrr/Pages/default.aspx>.

Millikin Premier Writers

- It should be noted that Dr. Braniger and students Caitlin Husted and Brittany Mytnik continued to refine the MPW contest/initiative. In particular, they worked hard to make the contest open to all CWRR students (not just IN 151 students); additionally, they're also actively addressing the faculty concerns of affordability of the text, editor training, and submission assessment. To that end, they received a performance-based learning grant from Millikin University to continue their fine efforts. We look forward to seeing how the initiative grows; it is to our credit that we have a way to celebrate the work our first year writers are doing.
- The MPW helps meets the first year writing goal of writing for a public audience, as students are asked to work closely with a student editor to revise their work for a new audience. It also supports Millikin's broader performance based learning commitment.
- As a side note, the 2015 HURF winner—a prestigious competition—was featured in the first edition of the MPW.

Section 3: Assessment Data and Analysis

Overview of Artifact Assessment

As indicated earlier in this document, IN 150/IN 151 uses authentic assessment, which means that a team of IN 150/151 faculty examines actual student writing. Specifically, the faculty use rubrics (see appendices) to assess a random 10% of each collected artifact from the past academic year. These rubrics are calibrated to the performance goals that are embedded in the three student artifacts collected (see table 9). To facilitate this process, students are asked to upload each artifact to a Moodle shell. In 2014-2015, 383 (out of 475) students submitted a reflection essay (81%), 259 (out of 382) submitted a reading response (68%), and 275 (out of 382) submitted a research essay for artifact collection (72%). As such, we had the best response for the reflection essay; in general, though, it is encouraging to see such a large percentage of our students submitting their artifacts for programmatic assessment. One goal for next year

would be to increase our numbers even more and strive to have at least 75% of all enrolled students submit their essays to Moodle.

IN 2014/2015, the three faculty who assessed student artifacts were Dr. Jeff Kirchoff (Coordinator of First Year Writing), Professor Judi Crowe (Director of the Writing Center), and Dr. Carmella Braniger (the former Coordinator of First Year Writing). For the annual assessment, the three assessment team members met for a pre-assessment norming meeting, where they discussed the rubrics, scored sample artifacts using the rubrics, and then compared their scores with each other. They then discussed the similarities and discrepancies among the three scores and used this discussion as a way to generate consensus about using the rubrics.

Assessment team members individually score the artifacts assigned to them at random by Cindie Zelhart; these scores are then given to the Coordinator of First Year Writing. The Coordinator collects the assessment results, graphically depicts the data, analyzes and assesses the data, and writes the annual report. A draft is shared first among the Assessment Team before being shared with the entire CWRR faculty.

It should be noted that we are currently using “traffic signal” performance indicators to evaluate and assess; the rubrics are aligned with these performance indicators and performance goals. Each collected artifact receives a performance indicator using the following scale:

CWRR Artifact Performance Indicators (Scale Based on Percentages):

Nominal (Red—Stop)	Adequate (Yellow--Caution)	Excellent (Green—Go)
0-52%	53-74%	75-100%

Green : A high level indicating clear movement in the right direction, not requiring any immediate change in course of action. Continuing support should be provided.

Yellow: An average, acceptable level indicating either some improvement, but not as quickly as desired, or indicating a slight decline in performance. Strategies and approaches should be reviewed and appropriate adjustments made to reach an acceptable level or desired rate of improvement.

Red: An unacceptable status or direction of change. Immediate, high priority actions should be taken to address this area.

A Reminder of Performance Goals

The learning outcome goals of the two-course sequence of IN 150 and 151 are as follows:

5. Read critically to comprehend, analyze and evaluate texts
6. Write polished, informed essays for personal, public and/or specialized audiences
7. Conduct research to participate in academic inquiry
8. Reflect on engagements with critical reading, writing and research to acquire, examine

and present self-awareness about those engagements.

Table 9: Learning Goals/Artifacts

Data	Goal 1	Goal 2	Goal 3	Goal 4
Reading Response	X	X		
Research Essay	X	X	X	
Reflection		X		X

Artifact Collection Data

Table 10: Reflection Performance 2009-2015

Academic Year	Identification and articulation of self-awareness 1-5 pts	Critical Examination and Evaluation of Self-Awareness 1-5 pts	Presentation of Self awareness to public audience 1-5 pts	Total Points (out of 15)
2014-2015	3.66 (73%)	3.39 (68%)	2.7 (54%)	9.77 (65%)
2013-2014	3.5 (70%)	3.3 (66%)	3 (60%)	9.78 (65%)

2010-2011	Data Missing	Data Missing	Data Missing	Data Missing
2009-2010	2.65 (53%)	2.88 (57.6%)	2.68 (53.6%)	8.74 (58.2%)

Table 11: Reading Response Performance 2009-2015

Academic Year	Reading 1-5 pts	Critiquing 1-5 pts	Writing 1-3 pts	Total Points (out of 13)
2014-2015	3.03 (61%)	3.36 (67%)	2.26 (75%)	8.65 (66.5%)
2013-2014	3.8 (76%)	3.6 (72%)	2.5 (83%)	9.88 (76%)
2012-2013	3.8 (76%)	3.4 (68%)	2.1 (70%)	9.3 (72%)
2011-2012	3.6 (72%)	3.1 (62%)	2.5 (83%)	9.2 (71%)
2010-2011	Data Missing	Data Missing	Data Missing	Data Missing
2009-2010	3.86 (77%)	3.43 (68.6%)	2.52 (84%)	9.82 (75.5%)

Table 12: Research Performance 2014-2015

NOTE: A drastically revised rubric was used this year for this artifact; 2009-2014 research performance can be seen in Table 13.

Academic Year	Research 1-5 pts	Organization 1-5 pts	Audience 1-3 pts	Polished 1-2 pts	Total Points (out of 15)
2014-2015	3.3 (66%)	3.07 (61%)	1.9 (63%)	1.29 (64.5%)	9.56 (63.7%)

Table 13: Research Performance 2009-2014

Academic Year	Research 1-5 pts	Informed 1-5 pts	Audience 1-3 pts	Polished 1-2 pts	Total Points (out of 15)
2013-2014	3.5 (70%)	3.5 (70%)	2.4 (80%)	1.2 (60%)	10.4 (69%)
2012-2013	3.4 (68%)	3.3 (67%)	2.1 (70%)	1 (51%)	9.8 (65%)
2011-2012	3.7 (74%)	3.6 (72%)	2.4 (80%)	1.5 (75%)	11.1 (74%)

2010-2011	Data Missing	Data Missing	Data Missing	Data Missing	Data Missing
2009-2010	3.87 (77.4%)	3.625 (72.5%)	2.428 (80.9%)	1.642 (82.1%)	11.57 (77.13%)

Artifact Analysis

An analysis of the data indicates that 2014-2015 yielded the lowest artifact scores from the past six years. As such, each artifact was squarely in yellow. These scores suggest a slight decline overall in terms of artifacts meeting performance goals which is particularly noticeable in the reading reflection and the research essay. Perhaps it should be noted that both of these artifacts are collected in IN 151.

A more in-depth analysis shows that students may be especially struggling in the following areas, as these received the lowest scores in artifact assessment:

- Organization of lengthy research projects (61%)
- Capably summarizing major aspects of a text (61%)
- An ability to present reflective thoughts to a public audience (54%)
 - NOTE: This last bullet point is dangerously close to red

As such, it is recommended that instructors review how it is approaching these concepts when teaching these three artifacts. Section five contains more suggestions and concrete steps for how we might improve our scores.

Section 4: Suggestions for 2015-2016

Below are seven goals for the first year writing program moving forward.

Changing Placement Protocol

- Our current placement protocol does not look at every student's writing. Instead, only students who have earned a composite score of 18 on the English and Reading portions of the ACT are asked (not mandated) to produce a writing sample (usually a response to a prompt). These students are then placed into either an "E" section or a traditional IN 150 section. Historically, Professor Crowe and Dr. Matthews have assessed these samples on a volunteer basis—and their efforts are to be applauded.
- Any student that does not submit a writing sample is subject to placement by the Office of Student Success and the Registrar—usually using a formula that includes variables such as student GPA and ACT score.
- Unfortunately, however, misplacement is a concern.
 - Several faculty—tenured/tenure track and adjunct alike—have indicated that there are several students in their traditional IN 150s that should be placed in an IN 150E.
 - Since 2010, over 60+ students (the equivalent of three traditional IN 150 sections) have earned a grade of D+ or lower in IN 150. While we cannot solely rely on grades as an indicator, because there are several other factors that go into the grade a student earns, misplacement is certainly one factor that could go into this.

- Because the best practices mandate that placement is a) authentic and b) demonstrates inter-rater reliability, Dr. Kirchoff has begun making the arguments to change placement protocol so that all non-honors students will be asked to submit a short response to a question when they sign up for Orientation and Registration. Kirchoff will then assemble a placement team—which, pending approval, would receive a small monetary stipend—and assess writing samples two weeks before Orientation and Registration. Should this be approved at an admissions level, Kirchoff will provide more information about the new placement protocol.

Addressing low artifact scores

- There is no doubt that we saw lower than normal scores in artifact analysis. There could be for any number of reasons for this—chief among them increasingly under-prepared students being accepted to Millikin—but regardless, we need to at least consider ways we can best help our students meet the course objectives.
- One way this will be addressed is a re-commitment to workshop-style CWRR meetings, as discussed in section two. Though monthly meetings will still be used to provide updates regarding the first year writing program to faculty, the bulk of the time should be spent discussing first year writing pedagogy. While this has been done in an informal sense (e.g. sitting in a circle and asking people to share ideas), this upcoming year will hopefully address this more formally (e.g. asking faculty to walk us through assignment units).
- We should also consider further revision to the artifact assessment rubrics. For example, we may wish to reconsider our reflection essay rubric; currently, there is a category devoted to a student's ability to write for a public audience. While there is no denying the importance of this, we should discuss whether the reflection is the best artifact to assess a student's audience awareness. While already addressed on the research essay rubric explicitly, we could also address this on the reading response.
- We may also wish to open up conversations about the possibility of giving instructors the choice of when they wish to teach the reading response and/or the reflection essay. Many instructors feel more comfortable teaching the reflection essay at the end of the two course writing sequence; similarly, some instructors might already embed a reading response essay in IN 150 as we begin to introduce students to critical reading. Giving instructors this flexibility allows us to play to the instructors' pedagogical strengths. However, this is rife with difficulty, as adopting this model would open the possibility of some students having to write a reflection essay two semesters in a row, while never needing to compose a reading reflection.
- Lastly, perhaps we could broach the possibility of examining a larger percentage of artifacts—perhaps going back to examining 20% of submissions instead of the 10% we currently use. Though 10% meets best practices (as put forth by the Council on Writing Program Administration), the CWPA also notes that the more student artifacts examined, the more *reliable* the data-set. Thus, before we sound too many alarm bells, we should probably examine a larger data-set over a two to three year period of time to better assess how well our students are meeting course objectives.

IAI Transfer

- The Illinois Articulation Initiative exists so that students can more easily transfer from one institution to another.
- Though we do not want to encourage students to leave Millikin, joining this consortium will serve to attract more transfer students to Millikin University.
- As such, the first year writing program will work to become “IAI compliant.” This means that if a student comes from an IAI approved school/first year writing curriculum and has already successfully completed their former school’s writing sequence, that student will not need to take IN 150 and IN 151.
- It is of note that many of our peer institutions are already IAI compliant. Additionally, it is a goal of the Provost to have all our general education courses IAI approved.
- We already meet most of the IAI requirements. The biggest change this will require is adjusting the passing grade of IN 150 and IN 151 from a D- to a C (a requirement already put in place for Nursing and Education majors).
 - Note: this will impact our course offerings each year, as more students will need to re-take IN 150 and IN 151. Consider the following numbers:
 - IN 150
 - 2009: 38 earned between a C- and a D-
 - 2010: 36 earned between a C- and a D-
 - 2011: 33 earned between a C- and a D-
 - 2012: 29 earned between a C- and a D-
 - 2013: 36 earned between a C- and a D-
 - Average = 34.4, or 2 (more than likely) additional off-semester courses.
 - IN 151
 - 2010: 39 earned between a C- and a D-
 - 2011: 25 earned between a C- and a D-
 - 2012: 41 earned between a C- and a D-
 - 2013: 46 earned between a C- and a D-
 - 2014: 46 earned between a C- and a D-
 - Average = 39.4, or 2 to 3 additional IN 151 off-semester courses.
 - So if we were to pursue IAI, it would most likely mean the hiring of an additional adjunct—and adding some additional courses to the books. This is, of course, a budgetary concern.
- This proposal will be brought to council on curriculum in Fall 2015. First year writing faculty will be given periodic updates.

IN 151 Course Titles

- Many faculty choose to theme their IN 151 courses. At the request of the registrar and students, we will aim to provide the registrar with *titles* (not descriptions) for all our spring IN 151 courses. Naturally, if there is no theme, no title needs to be provided.

Continuing WE Initiative

- As mentioned throughout this document, we should continue to support and strengthen the Wireless Environment Initiative. At present, this means continuing to work with various committees to secure partnerships that will allow students to purchase laptops at a discounted rate.
- This initiative is important because a) it allows students to write *every day* using a tool that they are most familiar with and b) it will better support multimodal literacies (see below).

Address learning goals to include multimodal literacies (long-term)

- In the near future, our first year writing program needs to address the National Council of Teachers of English position statement on literacy. Here, they note that 21st century writers need to be able to “create, critique, analyze, and evaluate multimedia texts.” As instructors of writing, we need to ensure that our students are best prepared to be composers in the 21st century—and this means addressing (in some fashion) multimodal literacy. This is a long-term goal, but one that could begin to be discussed at CWRR meetings this year. Kirchoff will engage faculty in one-on-one conversations about this topic throughout the academic year.

Continue revitalizing presence on website: including teacher philosophies

- In an effort to aide in the recruitment process, we should actively consider our visibility digitally. As such, it may be useful to follow the lead of other writing programs (e.g. Bowling Green State University, among others) and have all first year writing instructors provide teaching philosophies that can be posted on our website. This will allow students (and parents) to better get to know our program, our faculty, and our commitment to student success.

Appendix A: Rubrics for Assessment

Reading Response Artifact Assessment Rubric (revised in 2007; 2015)

Millikin University

Critical Writing, Reading and Research Program

Evaluation of CWRR Goal 1 and 2

- “read and critique texts actively, deliberately, and carefully”
- “write . . . polished essays for personal, public, and/or specialized audiences”

Item Evaluated: **Reading Response (Collected in IN 151). Please note that the “reading” can also include a website, film, or other text-type determined by the instructor.**

Evaluation by: Self-Study Assessment Team Member

	Excellent (Green—Go)	Adequate (Yellow—Caution)	Nominal (Red—Stop)	Points
Reading	An excellent reading response contains a detailed and careful summary of the major aspects of the reading. Student demonstrates that s/he understands the structure and strategy of the text’s argument and/or play of ideas. [5 points]	An adequate reading response may contain a summary that is slightly confusing or too long/short. The student shows an understanding of the text, but does not actively engage with the structure or strategy of the text’s argument and/or play of ideas. [3 points]	A nominal reading response contains an incomplete summary or misunderstanding of the major aspects of the reading. [1 point]	
Critiquing	An excellent reading response contains careful, well-supported, and well-positioned judgments; similarly, an excellent reading response contains thoughtful, well-reasoned insights about the reading. [5 points]	An adequate reading response contains only some careful, supported and positioned judgments and/or insights regarding the reading. [3 points]	A nominal response contains no judgments or insights about the reading. [1 point]	
Writing	An excellent reading response demonstrates the student’s ability to proofread and edit his or her work. [3 points]	A good reading response demonstrates the student’s attempt to proofread and edit his or her work. [2 point]	A nominal reading response demonstrates the student did not attempt to proofread and edit his work. [1 points]	

Total Points for this Student:

Final Signal Rating:

Excellent (Green—Go)	Adequate (Yellow—Caution)	Nominal (Red—Stop)
10.5-13	7-10.5	1-6

**Research Essay Artifact Assessment Rubric
(Revised 2015)**
Millikin University
Critical Writing, Reading and Research Program
Student Learning Evaluation

Evaluation of CWRR Goal 2 and 3

- Conduct research to participate in academic inquiry”
- “write polished, informed essays for personal, public, and/or specialized audiences”

Item Evaluated: **Research Essay (Collected in IN 151)**

Evaluation by: Self-Study Assessment Team Member

	EXCELLENT (GREEN—GO)	ADEQUATE (YELLOW— CAUTION)	NOMINAL (RED—STOP)	POINTS
Research	An excellent research essay demonstrates the student’s abilities to discuss, find, fairly use and synthesize a variety of reliable, academic sources in order to make judgments, analyze, and/or provide insights in ongoing academic conversations and inquiries. [5 points]	An adequate research essay demonstrates inconsistent attempts to find and synthesize a variety of reliable sources. There is an attempt to enter academic conversations. [3 points]	A nominal research essay demonstrates little or no attempt to use and synthesize multiple sources to enter an ongoing academic conversation. [1 point]	
Organization	An excellent research essay demonstrates the student’s abilities to formulate a well-positioned and well-supported argument through strong organization (e.g. clear, relevant introduction, accurate thesis statement or focus, logical transitions, conclusion etc.) [5 points]	An adequate research essay demonstrates the student’s inconsistent attempt to formulate an argument or opinion through moments of confusing organization (e.g. some paragraphs may be lacking topic sentences, the introduction’s attention getter is not clearly tied into the essay’s subject, etc.). [3 points]	Nominal essay demonstrates difficulty in basic organizational skills: no thesis statements, difficult topic sentences, challenging transitions, etc. [1 point]	
Audience	An excellent research essay demonstrates the student’s strong awareness of expectations and interests of specialized or public audiences. [3 points]	An adequate research essay demonstrates the inconsistent awareness of expectations of specialized or public audiences. [2 points]	A nominal essay demonstrates little/no awareness of expectations and interests of specialized/public audiences. [1 point]	
Polished	An excellent research essay demonstrates the student’s ability to compose a properly-documented and carefully edited piece. [2 points]	An adequate research essay reveals a student’s inconsistent documentation and/or a handful of grammatical errors. [1 point]	A nominal research essay demonstrates little or no attempt to edit and to document. [0 points]	

Total Points for this Student:

Final Signal Rating:

Excellent (Green—Go)	Adequate (Yellow—Caution)	Nominal (Red—Stop)
12-15	8-11	1-7

Reflection Artifact Assessment Rubric
(revised in 2009, 2013, and 2015)
 Millikin University
 Critical Writing, Reading and Research Program
 Student Learning Evaluation

Evaluation of CWRR goals 2 and 4

- “write . . . for personal, public and/or specialized audiences.”
- “reflect on the uses of reading and writing in their public and personal lives to better understand themselves, their communities and the world”

Item Evaluated: **Reflection Essay (Collected in IN 150).**

Evaluation by: Self-Study Assessment Team Member

	EXCELLENT (GREEN—GO)	ADEQUATE (YELLOW—CAUTION)	NOMINAL (RED—STOP)	POINTS
Identification and articulation of Self-awareness	An excellent reflection demonstrates students’ ability to clearly identify and articulate new knowledge about the self and/or reading, writing, and research processes. [5 points]	An adequate reflection demonstrates the student’s attempt to clearly identify and articulate new knowledge about the self and/or reading, writing, and research processes, [3 points]	A nominal reflection lacks attempt to identify and articulate new knowledge about the self and/or reading, writing, and research processes. [1 point]	
Critical examination and evaluation of self-awareness	An excellent reflection demonstrates the student’s ability to critically analyze and evaluate the new knowledge about the self and/or reading, writing, and research processes. [5 points]	An adequate reflection demonstrates the student’s attempt to critically analyze and evaluate the new knowledge about the self and/or reading, writing, and research processes. [3 points]	A nominal reflection lacks attempt to critically analyze and evaluate the new knowledge about the self and/or reading, writing, and research processes. [1 point]	
Presentation of self awareness to a public audience	An excellent reflection demonstrates the student’s ability to present new knowledge about the self to a public audience. [5 points]	An adequate reflection demonstrates the student’s attempt to present new knowledge about the self to a public audience. [3 points]	A nominal reflection lacks attempt to present new knowledge about the self to a public audience. [1 points]	

Total Points for this Student:

Final Signal Rating:

Excellent (Green—Go)	Adequate (Yellow--Caution)	Nominal (Red—Stop)
12-15	8-11	1-7

Appendix B: Summary of Rubric Revisions

Reading Response

Category 1

- Eliminate language referring to “passive language”
- Clarify language of the summary

Category 2

- Added “insights” to “judgments”

Research Essay

Category 1

- Cleaned up the language
- Added clarification that sources can be used to not only make judgments on conversations, but also analyze and provide insight

Category 2

- Replaced “Informed” with “organization”
 - No place for organization on rubric
 - Informed had a lot of cross-over with research

Category 4

- Polished now refers solely to citations and grammar/mechanics

Reflection

- Added important language at the beginning of the rubric to mirror the language/organization of the rubrics
